SUMMARY

Computing & Data Science student at Alexandria University with hands-on experience building predictive models and end-to-end data pipelines using Python, SQL, TensorFlow, PyTorch, and Scikit-learn. Skilled in data visualization with Power BI and Streamlit, with project experience spanning data classification, large-scale analysis, and IoT systems — grounded in a strong foundation in statistics, databases, and algorithms.

EDUCATION

Alexandria University, Faculty of Computing and Data Science

Sep 2023 - Present

Alexandria, Egypt : Bachelor's, Computing & Data Science Expected Jun 2027

EXPERIENCE

Alexandria University, Faculty of Computing and Data Science Egypt

Jul 2025 - Aug 2025

Field Training – IoT Systems Development

Completed an intensive 7-week field training program in IoT system design and implementation, working hands-on with ESP32, sensors, and embedded systems via PlatformIO and Wokwi. Applied communication protocols including MQTT, I2C, SPI, and UART, with cloud integration using HiveMQ and Supabase. Led a team capstone project building a **Smart Pet Care System** — a real-time IoT solution using ESP32 (C), Flutter mobile app, and Flask backend to monitor food and water levels with instant alerts.

SKILLS

Data Science, Machine Learning, Artificial Intelligence, Data Analysis,
Python, R, C, Java, JavaScript, SQL, Database, Data Structures and Algorithms, Problem Solving,
TensorFlow, PyTorch, scikit-learn, Pandas, Numpy, Microsoft Power BI, Plotly, Seaborn, Streamlit,
Hadoop, Distributed Processing, Flask, Jupyter Notebook, Visual Studio Code, Amazon Web Services (AWS),
Cloud Integration, Flutter, Internet of Things (IoT), MQTT, Linux, Git Version Control,
Team Collaboration, Critical Thinking, Technical Communication

Projects

HR Employee Attrition Analysis Dashboard - [Link](#)

Nov 2025

Identified high-risk groups (Sales Reps 39.8%, overtime workers 30.5%) by analyzing 1,470 employees across demographics and satisfaction metrics.

Uncovered 5 key retention factors contributing to 16.12% attrition rate using DAX correlation analysis and interactive filtering.

Skills: Power BI

Fashion MNIST Classifier - [Link](#)

June 2025

Built an ML pipeline achieving 89.37% test accuracy after hyper tuning with Optuna (3 layers, 86 neurons).

Launched a real-time Streamlit dashboard and recorded a reproducible workflow in Notebook for future hand-off.

Skills: Python, TensorFlow, Streamlit

Job Market Analysis - [Link](#)

May 2025

Processed over 8,000 job listings with an automated SQL pipeline, uncovering seasonal hiring trends and high-growth sectors in Egypt and Saudi Arabia.

Built 12 interactive visualizations with Plotly & Seaborn to present market dynamics and employer insights.

Skills: Python, SQL Server, Streamlit
