SUMMARY

I am a student at Alexandria University in Computing & Data Science as well. Proficient in developing predictive models and building data pipelines from end-to-end with Python, SQL, PyTorch, TensorFlow and Scikit-learn. Expertise in data visualization and BI tools like Power BI and Streamlit. Your final project completed projects in classifying or analyzing data, analyzing large scale data sets, strong theoretical background in statistics, databases and algorithms oriented towards AI & data-driven solutions.

EDUCATION

Alexandria University, Faculty of Computing and Data Science

Sep 2023 - Present

Alexandria, Egypt : Bachelor's, Computing & Data Science

EXPERIENCE

Faculty of Medicine Ain Shams University Egypt

Jul 2025 - Aug 2025

Field Training – IoT Systems Development

Undertook 7 week, intensive program/project-based focused training on IoT system design & implementation. Worked with ESP32, sensors and embedded systems using platformIO and Wokwi Utilized protocols like MQTT, I2C, SPI, and UART to communicate over IoT platforms with cloud services: HiveMQ and Supabase. Led a team with capstone project of IoT smart system using mobile based application and backend services

SKILLS

Data Science, Machine Learning, Artificial Intelligence, Data Analysis,
Python, R, C, Java, JavaScript, SQL, Database, Data Structures and Algorithms, Problem Solving,
TensorFlow, PyTorch, scikit-learn, Pandas, Numpy, Microsoft Power BI, Plotly, Seaborn, Streamlit,
Hadoop, Distributed Processing, Flask, Jupyter Notebook, Visual Studio Code, Amazon Web Services (AWS),
Cloud Integration, Flutter, Internet of Things (IoT), MQTT, Linux, Git Version Control,
Team Collaboration, Critical Thinking, Technical Communication

Projects

HR Employee Attrition Analysis Dashboard - [Link](#)

Nov 2025

Identified high-risk groups (Sales Reps 39.8%, overtime workers 30.5%) by analyzing 1,470 employees across demographics and satisfaction metrics.

Uncovered 5 key retention factors contributing to 16.12% attrition rate using DAX correlation analysis and interactive filtering.

Skills: Power BI

Fashion MNIST Classifier - [Link](#)

June 2025

Built an ML pipeline achieving 89.37% test accuracy after hyper tuning with Optuna (3 layers, 86 neurons).

Launched a real-time Streamlit dashboard and recorded a reproducible workflow in Notebook for future hand-off.

Skills: Python, TensorFlow, Streamlit

Job Market Analysis - [Link](#)

May 2025

Processed over 8,000 job listings with an automated SQL pipeline, uncovering seasonal hiring trends and high-growth sectors in Egypt and Saudi Arabia.

Built 12 interactive visualizations with Plotly & Seaborn to present market dynamics and employer insights.

Skills: Python, SQL Server, Streamlit
